- To ensure a safe work environment for all your employees.
- We are dedicated to grow and expand our activities to meet and exceed our customers expectations.

# WHY?

USE ECO FIELD

ECO FIELD product range has been rigorously tested and meets all local and international standards. (SABS, CSIR and ISO Approved)  
We are now in the process for the Green Tag accreditation

It offers a positive informed choice in order to protect your family, young and old , those with allergies and our environment.

SP Paint is a premium quality , fast curing coat designed not only for the industrial sector but also cater for areas where the health of the occupants like schools, hospitals, homes, offices, farming and the like is paramount.

## WHAT IS VOC?

- VOC = Volatile organic compound.
- VOC's are carbon-based chemicals that easily evaporate into gaseous forms at room temperature.
- VOC's are commonly referred to as solvents.
- This can be found in a wide range of paint and clean up products to improve performance or durability.
- Most clean-up operations often requires toxic solvents that release additional VOC pollutions.
- This is not the case with Greencoat Paint.

## KEY PRODUCT CHARACTERISTICS

**CAUTION**  
PAINT FUMES ARE  
TOXIC TO THE  
HUMAN BODY

- 1. Zero & Low V.O.C.
- 2. Lead Free
- 3. Acid Resistant

- 4. Fungus Resistant
- 5. Ultra Violet Resistant
- 6. Abrasion Resistant

- 7. Rust Preventative
- 8. Flexible
- 9. Non Toxic

- 10. Easy Application
- 11. Economic and Cost effective
- 12. Fire Retardant

- 13. Clean up with Water
